**POWER FACTOR ADJUSTMENT**

The customer agrees to maintain utility power factor as nearly practicable. Demand charges will be adjusted for Customer with 50 KW or more of measured demand to correct for average power factors lower than 90% and may be so adjusted for other customers if and when the Seller deems necessary. Such adjustments will be made by increasing the measured demand 1% for each 1% by which the average power factor is less than 90% lagging.
